

Kindergarten

Dear Parents,

For our Project Week, each student will be responsible for completing an Animal Project with display and presentation. The project is due on Friday, January 6th, 2023 and students will be presenting their projects orally on this day. The rubric and project information is attached.

**Please sign and return this letter to school. If you have any questions regarding the project, please do not hesitate to contact us.
Thank you for your continued support,**

We have received and reviewed the project and presentation information and are aware the project is due on Friday, January 6th, 2023.

Project Week 2023

Animals of the Seven Continents

January 3-5

Presentations on January 6, 2023

Instructions

Students will all be assigned an animal from one of the seven continents and create a report, visual representation, and short presentation.

- Students will need to complete the attached report by using a non-fiction book or reliable online source that provides adequate information about their animal. The more information you gather, the better prepared you will be to complete your report!
- Students will make a creative visual of the information recorded. The visual must include the animal, its habitat, and continent. (A poster, diorama, mobile, model, etc.)
- Students will prepare and memorize a verbal presentation to share with their classmates covering all components of the report. The speech should be 2-5 minutes in length.
- This project will count towards next quarter's history and science grade and should be completed with much care.

Name _____

Grading Rubric

CATEGORY	4	3	2	1
----------	---	---	---	---

Visual Component	Visual component is creative and realistically depicts the animal, habitat, continent and more information from the report beyond the expectations.	Visual component realistically depicts the animal, habitat, continent and other information from the report.	Visual component depicts the animal, continent, most of its habitat, but lacks other information from the report.	Visual component inaccurately depicts the animal and does not show the other necessary information for the report.
Research	Questions are answered with thoughtful and accurate statements.	Questions are answered completely with accurate statements.	Questions are not fully answered.	Questions are answered with incomplete or false information.
Grammar and Writing	Answers are in complete sentences with correct grammar. All letters are formed correctly with neat handwriting and all words spelled correctly. Picture answers are drawn with care in realistic color.	Answers are written in complete thoughts. Some mistakes with letter formation and clear handwriting and 2 or less words are spelled incorrectly. Pictures are drawn realistically.	Answers are mostly written in complete thought. Messy handwriting with 3 or less words spelled incorrectly. Pictures are drawn with little care and realism.	Answers are in incomplete thoughts. Messy handwriting with 4 or more words spelled incorrectly. Pictures are drawn carelessly and lack realism.
Presentation	Students speak confidently and clearly in complete sentences. The presentation is between 2-5 minutes. All required information and extra facts are memorized and reported.	Students speak clearly in complete sentences. The presentation is between 2-5 minutes. All required information is memorized and reported.	Students present with little assistance. The majority of information is presented and memorized in a timely manner.	Students struggle to present their report independently. The speech is not memorized or confidently shared. Information is missing.
